Report Building

Adaptable Software Developer, with a proven ability to build quality and innovative solutions. Skilled in designing, and developing multiple responsive web-based applications incorporating a range of technologies. Aspiring to obtain a position where I can tackle development/design challenges to achieve lasting impacts on the existing codebase.

WORK EXPERIENCE

SOFTWARE DEVELOPER INTERN | OFF THE RECORD, 2022

- Created and assisted with the design, development, and debugging of a global search that fetched, parsed, and formatted data using Angular components.
- Developed accessible and responsive user interfaces to allow visitors on any device the same experience.
- Improved internal tools based on industry and company standards increasing efficiency for the customer service team.
- Collaborated with the development team of four engineers using Scrum methodologies to take ideas to production.

ASSISTANT BUYER | ZULILY, 2019-2021

- Pioneered a 6+ team strategy that brought in $5 million in product sales within the first year.
- Analyzed internal data to manipulate and build reports to make data-driven decisions based on consumer buying patterns.
- Collaborated with cross-functional teams to execute 150+ dynamic and engaging events on an e-commerce platform monthly.
- Managed 20 international vendors to build relationships, secure inventory, and develop cost reductions to exceed margin goals.
- Assisted Senior Buyer in forecasting current category market trends to ensure consistent product flow.

EDUCATION

FULL STACK SOFTWARE DEVELOPER BOOTCAMP - EPICODUS

- 27-weeks of full-time coursework using multiple languages and frameworks to create a portfolio of projects.
- Paired and Independent programming focused on full-stack web applications.

UNIVERSITY OF NEBRASKA - LINCOLN

- Bachelor of Science in Business Administration | Major: Marketing
- Bachelor of Science in Education and Human Sciences | Major: Merchandising
  - Minor: Business

PROJECTS:

Elevate Everyday - React.js web application with full CRUD for workouts using Firestore, Authentication, Semantic UI, HTML, CSS, and Bootstrap.

Podify - Personal database to store podcasts in categories. Using C#/.NET, RESTful routing, MySQL, and CSS.
