PAIGE TIEDEMAN

Full Stack Software Engineer | Agile & Integration Expert | JavaScript & C# Specialist

206-948-4153 paigetiedeman@gmail.com https://www.linkedin.com/in/paige-tiedeman/

SUMMARY

Full-stack software engineer with 3+ years building high-availability web apps in .NET and React/Vue, supporting 10,000+ users. Delivered 30% uptime/reliability gains, 25% front-end performance improvement, and 20% faster builds via CI and code quality improvements. Strengths in accessibility, secure third-party integrations (Stripe, Concur), and Azure deployments. Seeking roles where I can drive performance, reliability, and delivery speed across the stack.

EXPERIENCE

Software Engineer II

Stova

04/2022 - 07/2025 Remote

- Engineered a complex custom solution incorporating extensive backend logic, role-based access control, and third-party API integrations to support 10,000+ users, demonstrating strong full stack engineering capabilities
- Collaborated with designers, project managers, and QA teams to implement new features and troubleshoot issues, leading to smooth delivery, improved user experience, and successful project completions
- Optimized website performance and responsiveness across multiple browsers and devices by applying HTML, CSS/SCSS best practices, accessibility standards, and SEO enhancements
- Diagnosed and resolved full stack issues-from database queries to front-end behavior-enhancing system reliability, API performance, and user satisfaction
- Contributed to agile development processes including code reviews and continuous feedback, optimizing build templates and reducing build time by 20%

Software Developer Intern

Off The Record

01/2022 - 02/2022 Remote

- Conceptualized and developed in the design, development, and debugging of a global search feature using Angular components, emphasizing both front-end functionality and efficient API integration
- Implemented over 8 UX improvements based on industry standards and collaborative feedback with the lead designer, thereby enhancing the performance and usability of the admin tool
- Collaborated within a Scrum-based team of four engineers to deliver production-ready features, ensuring adherence to modern full stack development practices and efficient project execution

EDUCATION

Full Stack Software Engineer

Epicodus

08/2021 - 02/2022

Master's Certificate, Data Analytics

Cornell University

08/2019 - 09/2019

Bachelor of Science, Business Administration, Marketing

University of Nebraska-Lincoln

08/2014 - 05/2019

Bachelor of Science, Merchandising and Buying Operations

University of Nebraska-Lincoln

08/2014 - 05/2019

SKILLS

Programming Languages:

C#, SQL, JavaScript, HTML, CSS/SCSS

Frameworks & Libraries:

ASP .NET MVC, Bootstrap, NPM, React, Vue, JQuery

Web Development:

Front-End, Back-End, Git, Web Content Accessibility Guidelines (WCAG), UI/UX, REST API Development, Localization

Tools & Collaboration:

GitHub, Postman, Jira, Teams, Slack, Visual Studio, SQL Server Management Studio, Microsoft Office

Integrations:

Concur, SpotMe, Stripe, Social Sharing, Bing Maps, CMS

Methodologies:

Agile, Scrum

Cloud:

Azure

PROJECTS

Grainger Sales Meeting

Staging site

- Developed complex registration website, resulting in {30%} increase in user registrations, by integrating {3} third-party services using.

Microsoft Ignite

Live site

- Improved site accessibility by achieving 100% ADA compliance through comprehensive building and testing efforts.
